Company Handbook and General Policies

Version: 1.0 | **Effective date:** 01 January 2026 | **Applies to:** Fictional demo employees

Training document only. These rules are invented for the sample Employee AI Portal and must not be treated as a real company policy or legal guidance.

1. Work schedule and attendance

Standard demo office hours are Monday to Friday, 9:30 AM to 6:30 PM India Standard Time, including a one-hour lunch break. Individual teams or locations may have different schedules communicated by their department manager.

Employees are expected to record attendance in the designated attendance system. Planned late arrivals or early departures should be communicated to their immediate manager.

2. Work-from-home policy

Eligible employees may request work from home for up to 2 days per week with prior manager approval. Submit the request at least 1 working day before the planned remote work date.

Work-from-home availability depends on business needs, role requirements, project confidentiality and manager discretion. Remote employees must remain reachable during agreed working hours.

3. Information security and acceptable AI use

Use company-approved applications and devices for company work. Protect employee records, client information and business documents. Do not share passwords or one-time authentication codes.

Never upload confidential company documents, employee credentials, payment details or personally identifiable information into unauthorized public AI tools. Report suspicious messages or security incidents to IT immediately.

The employee AI chatbot should only reveal the signed-in employee personal details; manager and HR roles require explicit permission checks for broader data access.

4. Expense claims and reimbursements

Business expense claims should be submitted within 30 calendar days of the expense date and must include receipts and a business purpose. Managers review claims before Finance processes reimbursement.

Travel costing more than INR 5,000 should obtain manager pre-approval. Reimbursement timings vary based on completeness of documentation and the payment cycle.

5. IT support and HR helpdesk

For technical issues, employees should create an IT support ticket describing the issue, device or application, impact and urgency. Never include passwords or secret API keys in the ticket text.

For policy clarification, payroll concerns, employee benefits, workplace issues or exceptional leave, create an HR helpdesk ticket. The ticket receives a reference number and starts with OPEN status. The employee can ask the chatbot for the ticket status.

6. Workplace conduct and communication

All employees are expected to communicate respectfully, protect confidential information and follow company safety and anti-harassment requirements. Escalate concerns to the HR team through approved channels.

Official policy updates should be distributed by authorized HR staff. When an old document conflicts with a new approved version, use the version currently published by HR.
